

DISTRIBUTION ZONES: DEFINITION AND MAP

Definition of distribution zones

In accordance with the previous approved methodology for balancing, the Danish and Swedish balancing zone is split into four regions, with three regions in Denmark and one in Sweden.

These regions are further separated into six distribution zones in the Joint Exit Zone, which have historically been divided based on the regional location of data suppliers.

Distribution zones (DIST)

- Distribution zone 1: Southern Jutland
- Distribution zone 2: Western Zealand, including the Copenhagen area
- Distribution zone 4: Northern Zealand
- Distribution zone 5: Northern Jutland
- Distribution zone 6: Funen
- Distribution zone 7: Sweden
