

APPENDIX 1.D

REQUIREMENTS FOR REACTIVE POWER CONTROL CAPABILITIES FOR POWER-GENERATING FACILITIES CONNECTED TO THE TRANSMISSION GRID

Network Code on requirements for grid connection
applicable to all generators (RfG)

Jacob Michael Jørgensen

This is a translation. In case of inconsistencies, the Danish version applies.

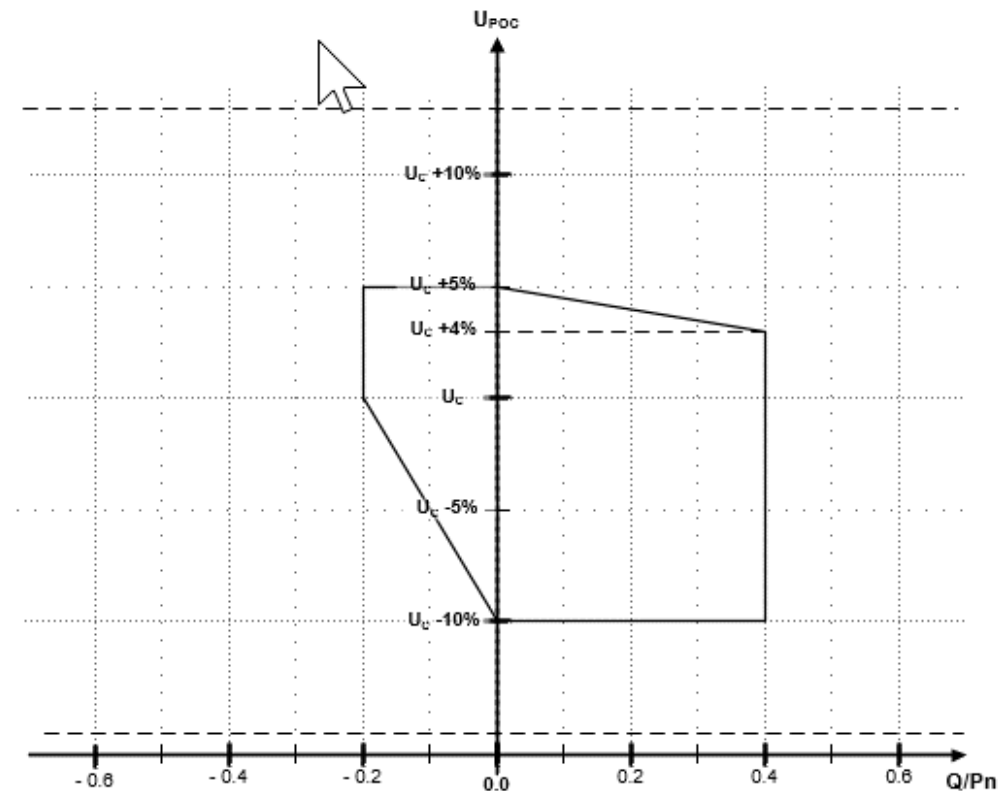

CONTENTS

Requirements for reactive power control capabilities for power-generating facilities connected to the transmission grid

- Requirements for U-QPn capabilities
- Requirements for P-QPn capabilities

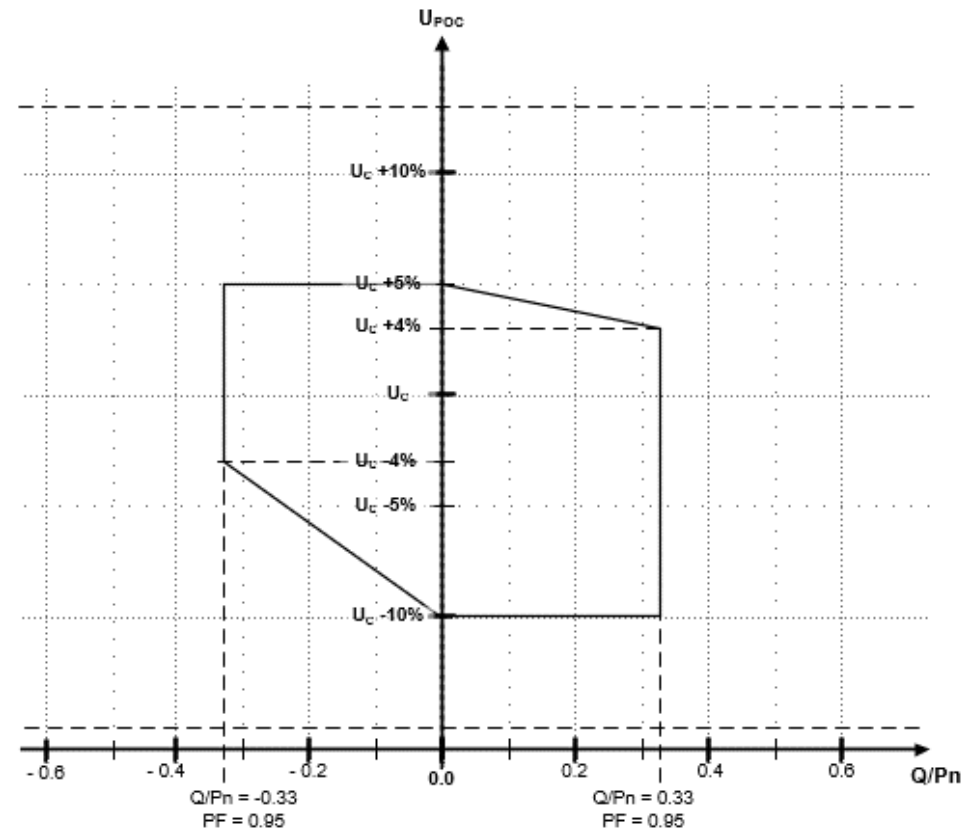

REQUIREMENTS FOR U-QPN CAPABILITIES

U-QPn capabilities for SPGM

REQUIREMENTS FOR U-QPN CAPABILITIES

U-QPn capabilities for PPM

REQUIREMENTS FOR P-QPN CAPABILITIES

P-QPn capabilities for PPM

 In this area, the reactive PPM capabilities may be limited if a reduced number of PPM units are in operation due to maintenance or faults.

 In this area, the reactive PPM capabilities may be limited if a reduced number of PPM units are in operation due to start-ups and shutdowns owing to lack of primary energy source, maintenance or faults.
